## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to a primer pair, classified in class 536, subclass 24.3.
  - II. Claim 18-49, drawn to methods of amplifying a target nucleic acid using a forward and reverse anchor, forward and reverse primer, forward and reverse universal primer, classified in class 435, subclass 91.2.
2. The inventions are distinct, each from the other because of the following reasons:
  - A) Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to a product and a method. The method does not rely upon the specific product claimed in the first group.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the different classifications and their divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1634

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
